

## **B.Sc. Microbiology (2018-2019) (started since 2017)**

### **Feedback Analysis of Students 2018 – 2019**

The students were asked to give their feedback on the up-to-date syllabus, standard of teaching, learning, evaluation and curriculum structure and outcomes. Their feedback reports were analysed for the action to be taken. Many students responded that the present syllabus is sufficiently to achieve the course objectives and programme objectives for B.Sc. Microbiology. The standard of teaching is very efficient in covering the courses with adequate class test and revision. The curriculum structure maintains a good balance between theory and practical applications.

#### **Action Taken Report**

The analysis of the overall feedback of the students shows that the majority of students are felt happy with the performance of the department and the course structure. Satisfactory opinion was obtained during the Board of Studies meeting and the same was put forth to the academic council for appreciation.

### **Feedback Analysis of Course Teacher 2018 – 2019**

We've received valuable feedback from our microbiology course teachers and thoroughly analysed. Some have suggested an increase in the number of practical experiments. Additionally, they've highlighted that the curriculum was specifically crafted to align with research and industry requirements and societal needs.

#### **Action Taken Report**

The current feedback from teachers is authentic and incremental to the programme, suggesting that immediate changes to the number of experiments. The proposed extension of lab experiments has been deliberated in the Board of Studies meeting and brought forth to the academic council for approval.

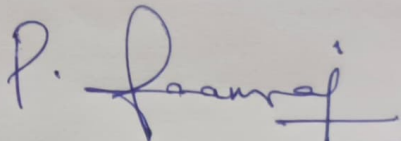

### **Feedback Analysis of Academicians 2018 – 2019**

The department employs a comprehensive approach to curriculum development equivalent to world class standards as per feedback reports from academicians. The analysis of this feedback indicates a high level of satisfaction with the current curriculum, as no suggestions for improvement were provided by the academicians. Academic experts further suggested to have international online

courses for the students other than the usual curriculum which may upgrade the students' overall knowledge and placement percentage.

### **Action Taken Report**

The academicians gave opinion that the current syllabi are well structured to enhance employment opportunities with no immediate need for alterations. However, the department can look for implementing recent technological advancements through online courses and invited lectures and make students stay updated with evolving technologies of Microbiology. Their suggestions were taken for approval by academic council and international invited lectures series and international online courses which can also be treated as FDP on recently evolving technologies in microbiology and biology were given at free cost to our students.
