

M.Sc. Applied Microbiology (2022-2023) (started since 2021)

Feedback Analysis of Students 2022 – 2023

The students were asked to give their feedback on the up-to-date syllabus, standard of teaching, learning and curriculum structure. Many students are satisfied with pedagogics of the department. Large number of the students responded that the present syllabus is above the calibre to achieve the course objectives and programme objectives for M.Sc. Applied Microbiology. The standard of teaching is effective and covered all the areas of course with crystal clear explanations, adequate class tests and revision before the commencement examination. The curriculum structure maintains adequate balance between theory, practical applications and research projects.

Action Taken Report

The analysis of the overall feedback of the students shows that the majority of students are felt happy with the performance of the department and the course structure. The same was discussed in the PG Board of Studies meeting and taken to the academic council for appreciation.

Feedback Analysis of Course Teacher 2022 – 2023

We've received valuable feedback from our microbiology course teachers and thoroughly analyzed. Some faculty have suggested to introduce model examinations for SET and NET aspirants. Additionally, they've highlighted that the curriculum was specifically crafted to align with needs of research, academia, industry and society.

Action Taken Report

The current feedback from teachers is authentic and incremental to the programme outcomes. No changes in PG curriculum were expected from faculty. We have also conducted mock test for SET and NET aspirants and trained with special lecture notes and quiz tests for PG students.

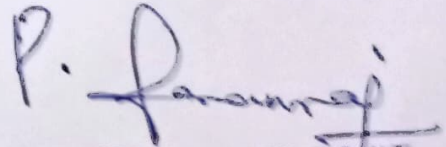

Feedback Analysis of Academicians 2022 – 2023

The department employs a comprehensive approach to PG curriculum development which reflects IIT and Central Universities standards as per feedback reports of expert academicians from various universities. The analysis of this feedback represents a high level of satisfaction with the current PG

curriculum, as no suggestions for improvement were provided by the academicians. Academic experts further suggested to have collaborative research projects which may upgrade the students' overall knowledge and research career.

Action Taken Report

The academicians gave opinion that the current syllabi are well structured to enhance employment opportunities with no immediate need for alterations. Their suggestions on collaborative research projects were taken into consideration and measures are taken in the forthcoming years to establish research collaboration with national and international organizations.

Dr. P. SARANRAJ, M.Sc., M.Phil., Ph.D., NCT.
