6. Remedial Programmes

No. of Staff Involved : 03

No. Students Benefited : 60

The students who are very weak in the subjects are encouraged to meet the concerned staff members in the afternoons personally. They are given simple assignments/problems which will help them to improve their understanding.

SHAPE Program

We mentor our first year students on the assigned days in the afternoons. Each staff member of our department is assigned around 20 students which makes it a little difficult to give full attention and follow-up.

8. Number of MoU's signed/and activities carried out:

The Department has initiated talks with the CSC Computers for organizing tally classes within the college campus. The terms will be finalized soon and the classes will be started from the upcoming semester. The students will be certified by the Tally institute itself. This initiative will help our students to find good jobs after their course.

9. Verification of files – (Files Enclosed)

10. Problems and Challenges

- The Department continues with only four staff members. Considering the student strength of the department we require an additional staff in order to function more efficiently. Apart from handling of the classes this hampers the other activities like documentation and sharing of responsibilities within the Department.
- Following up and understanding the lesson in English is a big challenge.
- Very poor level of motivation on the part of students.

11. Participation of Alumni (Alumni chapters)

Industrial visits and Expert talks are arranged with the help of Alumni. We try to get our alumni who were recently passed out to speak with our students and share their experiences.

12. Plans for the next year:

- To strengthen the placement prospects of our students and the progression of our students to higher studies. In the next academic year we plan to divide the students into three groups namely, placements, higher studies and entrepreneur aspirants and conduct events and programs for them based on their interest.
- We are looking forward to set up a MoU with a career/soft skills training institute to train our students on a regular basis.

13. Department Best Practices

- Sharing of business and employment news by the students in the department assemblies.
- Availability of staff in the evenings for the students.

Thank You

For the current subjects, cycle tests, unit tests, assignments are conducted in the Afternoon by the course teachers.

CHALLENGES

- Class strength prevents individual attention to the students.
- Class Rooms for special classes and Remedial classes
- PG Classroom space is not conducive.
- On average 10% absentees is observed at UG and PG level.
- Dropout due to boy-girl relationships inside and outside campus.
- More space needed for keeping documents.
- Since most Saturdays are working days, conducting certificate program is a challenging task.

ACHIEVEMENTS & BEST PRACTICES

- Launched a Mathematical Association (AARM)
- Skill based Curriculum for PG
- Conducting certificate Programs at PG and UG Level
- Conducting online examinations CA and Semester for PG
- Uploading materials for supplementary reading through MOODLE
- Similarity check for PG project and M.Phil., Dissertations
- Conducting conferences regularly & Publication of Papers in UGC listed journals and Scopus/WOS indexed Journals
- Publication of Research articles by M.Phil. scholars in UGC approved journals.
- Encourage the students to participate in seminar/conferences/ Workshops / outreach programs.
- Conducting class tests for 10-15 minutes.
- Conducting Pre- CA tests.

FUTURE PLANS

- More MOU's .
- Becoming a Research Institute.
- Getting More Funded Projects.

INDUSTRIAL VISIT REPORT

Date : 13.08.2019
 Place : Pondicherry (Dr. Abdul Kalam Science Centre)
 Duration : 3.00 am
 Organized by : M. Vignesh
 Guide by : Dr. M. S. Mahalingam
 Dr. M. D. Mangalam Anand Raj

Content :

First we went to a presentation show. There we saw a video clip, how our universe has been evolved and the science behind it. In Abdul Kalam science centre, we had two sections, one is fun science and another is Marine culture.

In fun science section, we saw tricky instruments based on physics concepts which we had never seen before.

In marine culture section we saw all marine animals along with their features. There we also able to see all types of sea shells, plants and also varieties which had been discovered. There we found a renewable energy resources park. There we also saw a large number of interesting exhibits on land space and history.

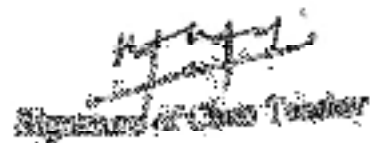

OUTCOMES :

As a result of educational tour, we came to know many interesting facts related to universe through presentation shows. We all enjoyed and acquired knowledge about how physics concepts have been used to create new tricky instruments through fun science section.

We gained knowledge about marine animals and their features through marine culture section. We came to know many energy resources instruments and their suitable area through renewable energy resources park.

Report on Industrial Visit to
Sophisticated Analytical Instruments Facility (SAIF), IIT, Madras

Date : 13 - 09 - 2019

Location: Indian Institute of Technology, Chennai

We 29 students of 2nd M. Sc. Physics and two Staff Members (Mr. G. Jayakumar and Dr. S. John Sundaram) and Department of Physics (shift - II), Sacred Heart College (Autonomus), Tirupattur went for an industrial visit to “SAIF lab, IIT madras, Chennai on 13.09.2019. Time was 4.00 am when we started from sacred Heart College, and 10.00 am reached IIT madras by bus,

It was an industrial visit to gain the first experience that how does the analytical Instrumental studies are carried out for the Crystals, Nanomaterials, etc. Before the lab visit gave the 20 minutes vedio presentation about the SAIF facilities. The Sophisticated Analytical Instruments Facility (SAIF), formerly known as RSIC, was established by Department of Science and Technology (DST). This is the first among the seven RSIC's established subsequently by DST. The purpose of establishing these centres is to provide data collection facility from sophisticated analytical equipments to scientific community for their advanced research with nominal charges. The facility has grown into a major centre for spectral measurements, molecular and crystal structure determination and materials characterization.

After the presentation, we went lab visit guided by the technical operators to demonstrate various instrumentation like

- High Resolution Scanning Electron Microscopy
- Fourier Transform Raman Spectrometer
- Fourier Transform Infrared spectrometer
- Thermal Gravimetric Analysis
- ESR/EPR spectrometer
- NMR Spectrometer
- UV Visible Spectrophotometer

The sessions were very much useful for us research analytical studies. After the Lab visit, we were started back around 5.00pm and reached the college by 11.00pm.

10. Problems and Challenges:

We have identified following two things has the big challenge in the I semester and reported in the mid-term evaluation.

- Since the average number of absentees in the class is 8 to 10, to minimize the number of absentees is a big challenge.
- The department should be provided with computer and other necessary equipment to maintain documents.

While the Department rectified the first challenge, the college provided the necessary equipment such as computer and printer.

The Department took serious effort to rectify the challenge of reducing the number of absentees in the I BA History.

After taking some strict measures, the department succeeded in reducing the number of everyday absentees.

The Present Challenge: Class room for remedial class

Since we have conducting the remedial class for the slow learners, we do not have any specific place for it.
